Mobile collage user flow

Ver 2, 9/11/09
Updates in blue

Main flow, for new users

1. App finish page, choose mobile option
2. Stepwise directions page, enter phone's email address *and select type of phone.*
3. Confirmation page says email sent, *and shows directions*.
4. User switches to phone and opens the email
5. User downloads the image and sets it as background

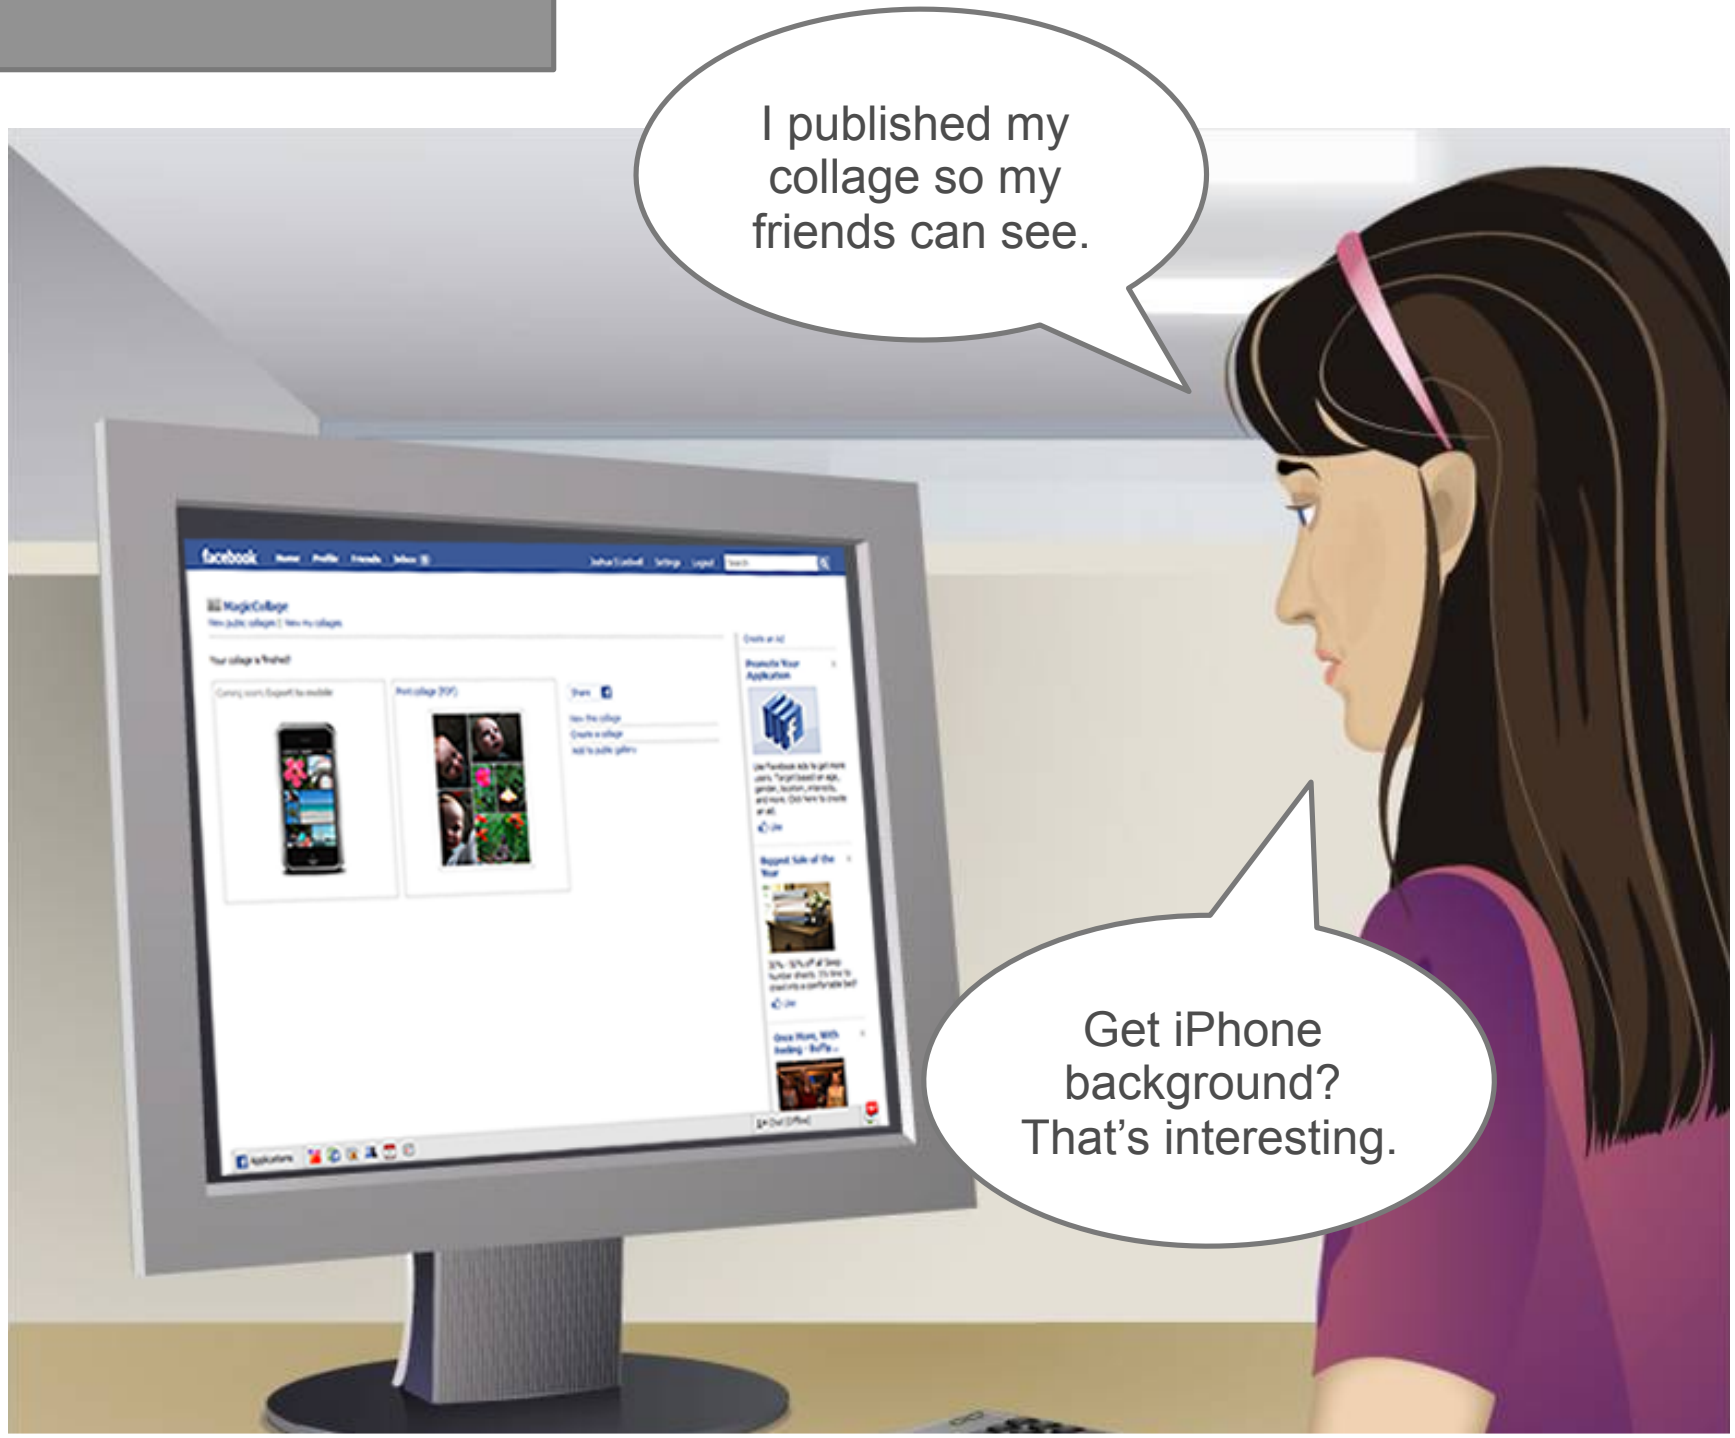
Additional pages

- Later, goes back and links back under My Collages
- Promotional message for existing users

New features

- Illustrated directions and help
- Add mobile link to My Collages
- Trustworthy-looking download domain (magiccollage.tabblo.com ?)

note



I published my collage so my friends can see.
Get iPhone background? That's interesting.

Enter email and phote

Mobile phone collage background

1. Email address to pick up on your phone

2. Select your phone model

- ○ Apple iPhone (all versions)
- ○ Blackberry Storm
- ○ Blackberry Abcdef
- ○ HTC Dream

Email my phone

Here's how it works

1. Enter your email address and select your phone. Important: use email you can read on your phone!
2. Open the email on your phone and use the download link.
3. Download the collage and set it as your background.

I've already spent a while on my collage, but this looks quick and fun.

Confirmation

Collage sent

We sent an email to iphonelove@mac.com.

Check email on your phone to get your collage!

Change your email or phone

Back to MagicCollage home

Get your collage on iPhone

1. Open your email and use the collage link. Your phone's browser will open, showing your collage.

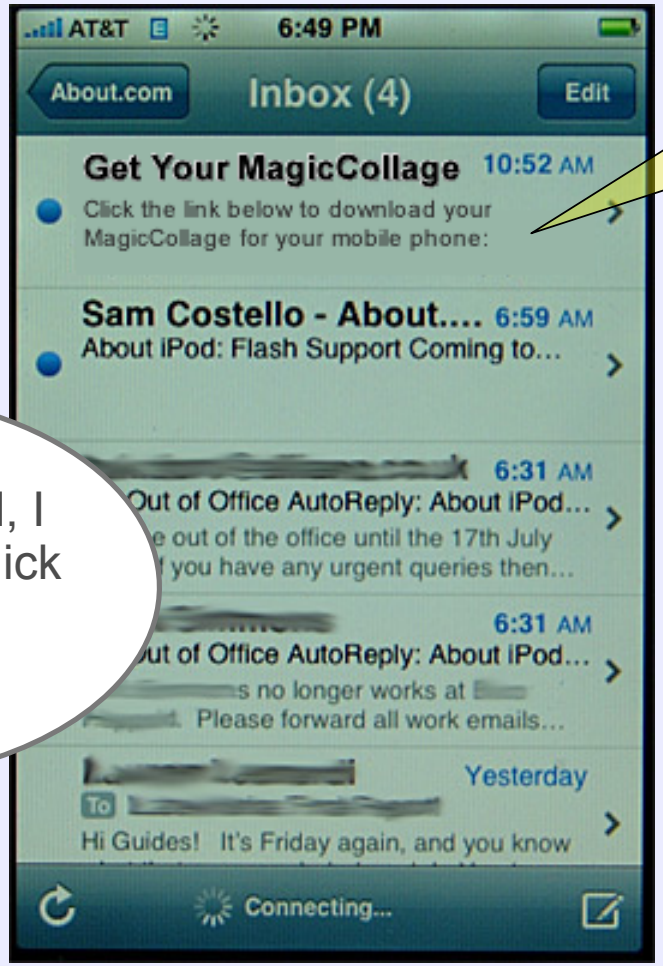
2. Touch and hold the collage until a menu pops up. Choose Save.

3. Open the Photo Roll app and select your collage .

4. Touch and hold until a menu pops up. Choose Set as Wallpaper.

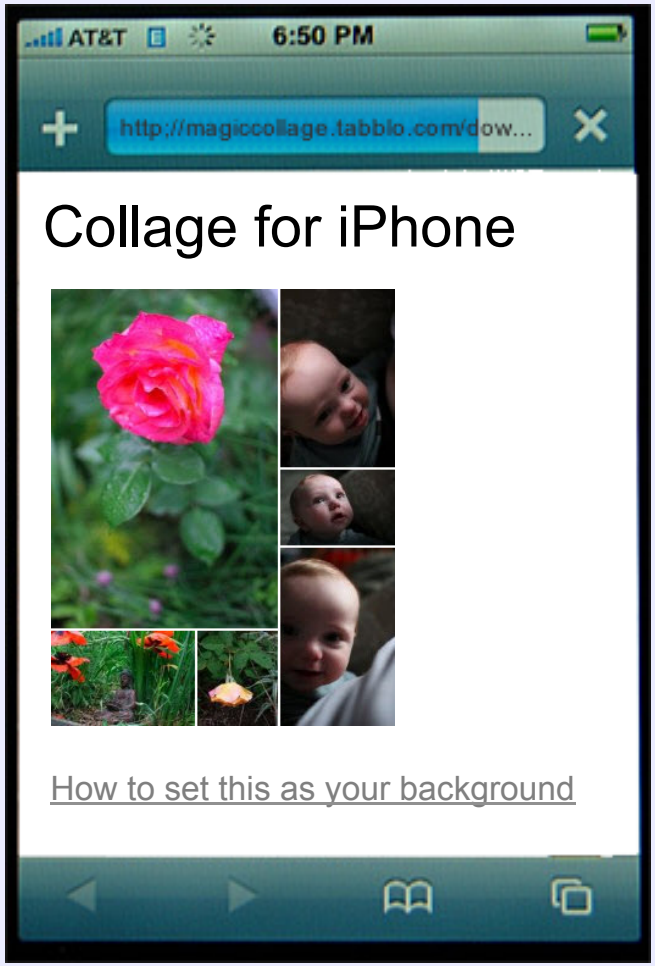
Okay, now I need to check the email on my phone …

Click link in phone email



Email also should include phone model directions

Download and set as background



Note: other iPhone UI steps not shown

Later …

Can I get another iPhone background from one of my old collages?
